FUNERAL RANGE MINES.

Captain J. R. De Lamar Is Now Inspecting His Kane Wonder.

specting His Kane Wonder.

Captain J. R. De Lamaraccompanied by his corps of engineers, is in the Funeral range, inspecting the Kane Wonder group of mines, says the Tonopah Sun. He bonded the property last year and is now making a close study of the showings. A tunnel 300 feet has been put in the hill. It is all in ore, that runs into three figures.

A mill is to be erected at once. Water is plentiful on the ground, and wood for fuel is to be had at a distance of not more than three miles. Timbers of sufficient size to be used in the shaft grow in profusion not more than seven miles distant.

Past Week's Output Amounted to 105 Carloads.

collections, and caused many cancellations. That production is maintained by mills and furnaces may be taken as evidence of confidence in the futures. Settlement of the protracted labor struggle at Fall River is encouraging, but the industrial atmosphere is distributed elsewhere, although on the whole, there is less than the customary idleness for this season. Railway earnings for January thus far show a gain of 2.3 per cent. Foreign commerce at this point is also better than a year ago, the last week showing gains of \$1,555.889 in value of imports and \$282,986 in exports.

Hides are still firm as a rule except that some declines are recorded on packer natives, as these constitute the bulk of current receizts. This is a seasonable influence and does not detract from the general tone of strength.
